CERTIFICATE OF ORIGINALITY

This is to certify that report entitled **"A COMPLETE COURSE ON IFRS - A STUDY"** is an original work of **Ms RACHANA S R** bearing University Register Number **P18CD23M015163** and is being submitted in partial fulfilment for the award of the Master Degree in Business Administration of Bengaluru City University. The report has not been submitted earlier to any University/institution to fulfilment the requirement of any course of study.

Ms. RACHANA S R is guided by **Mr SETHURAJAN S** who is the Faculty Guide as per the regulation of Bengaluru City University.

Place: Bengaluru

Date: **Signature and Seal of Director**

ACKNOWLEDGEMENT

The project titled "**A COMPLETE COURSE ON IFRS - A STUDY"** has been a good learning experience. I would like to utilise this opportunity to thank each and every one for their constant support throughout the completion of my project. First, I would like to convey my deepest gratitude and thanks to my respected guide **Mr SETHURAJAN S** for his valuable support and guidance given from day one. He helped me by giving valuable suggestion's and advice. This study could not be completed without his guidance and support. I would also like to thank our Director **Community Institute of Management Studies**, Bengaluru **Dr MAHESH KUMAR K R** for support given for completion of this project. Last but not the least, I thank my family and friends who in some or the other way helped me in completing this project.

EXECUTIVE SUMMARY

The IFRS stands for International Financial Reporting Standards, a broad field of study with great relevance today as globalisation becomes a factor for the necessity of establishing a common accounting language. IFRS brings transparency, accountability, and efficiency to financial markets worldwide, thus making it of value to a professional or a multinational business.

The project investigates the origin and development of IFRS, its main principles, and its importance in ensuring that financial statements are comparable and reliable across borders. It looks at the structure and role of the International Accounting Standards Board (IASB), the standard-setting body that gives birth to IFRS. Each module of this project analyses the core content of key components of IFRS, including recognition, measurement, presentation and disclosure requirements.

This project also discusses the challenges that adoption of IFRS brings like implementation costs, training, and alignment with regulation, especially in developing economies. Discusses the adoption status across different countries today including IndAS as India's path to convergence with IFRS.This course-based project entails the comprehensive conceptualization of IFRS, its pragmatic implications, as well as skills to be learnt for the successful application of such norms in real life making it significantly important for finance students who aspire to deal with the highly linked economies of the present day.

CHAPTER 1

INTRODUCTION

1.1INTRODUCTION TO IFRS

(Figure 1.1.1)

https://independent.ng/wp-content/uploads/2018/04/IFRS.jpg

Current economy is no longer under borders; business today is global. A company based in Japan may get investors from the US, suppliers in Germany, and customers in Brazil. All this international activity necessitates a standard way for reporting financial information; that is where International Financial Reporting Standards (IFRS).

With the latest economy, business has crossed borders and no longer has limit. A Japanese company might have investors from the US, suppliers from Germany, and customers in Brazil. The increasing international activity

demands a common mode to report financial world details. That is where International Financial Reporting Standards (IFRS) comes in.

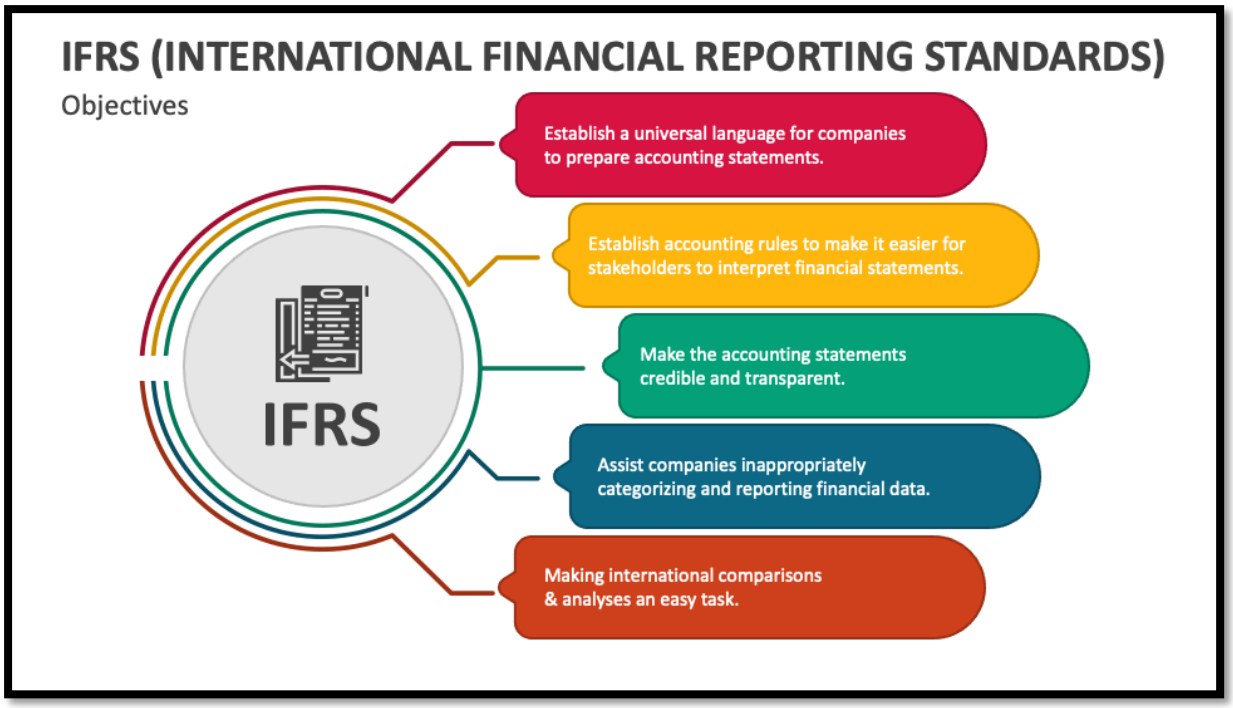

The IFRS stands for International Financial Reporting Standards and is a framework of accounting principles set by International Accounting Standard Board which brings uniformity and transparency to the books of the organizations across the world for ensuring comparability. Such standards are being continuously developed and administered by the IABs being based in London. The term written above shall comprise what it relates to IFRS for global businesses through financial information which could be understood and compared by all others, irrespective of location.

There are many economies worldwide that have evolved in line with the accounting systems under International Financial Reporting Standards: an answer to non-uniformity of financial reporting practices opened by International Accounting Standards and finally continued under the tag of International Financial Reporting Standards with no change in the form of accounting practiced by participants producing reports. Beyond these universal aims, however, there are local requirements within some jurisdictions; they mostly stem from outstanding features of national practices.

In countries outside the us, financial statements are prepared based on guidelines set up under the International Financial Reporting Standards. This set up internationally accepted guidelines for accounting practices between the Johannesburg-based international organization, international accounting standard board, and anywhere else in the world where such internationally accepted guidelines are adopted. Such guidance is intended to enhance consistency, transparency, and comparability of financial statements over the length and breadth of the world.

The premise of IFRS is just that - as related to where the business is situated; financial information should be understandable and comparable for all others - horizontally spread geographic location-wise. Consistency and comparability

are the essential elements of IFRS. IFRS is denoting International Financial Reporting Standards. These standards set the framework of accounting principles developed and maintained by international accounting standard boards. However, these boards are independent based in London. Therefore, one looks at what the premise of IFRS is, it is one that translates to all businesses without exception, whether located in different regions around the globe.

(Figure 1.1.2)

https://www.collidu.com/media/catalog/product/img/a/a/aa4381211821d4fb3855df99113cb42e5f2f447b0a74d70b245ba5bd2f2e3987/ifrs-international-financial-reporting-standards-slide2.png

Prior to the introduction of the IFRS, each nation would often subscribe to its own accounting standards leading to confusion and difficulty in comparing companies across borders. To illustrate, an Indian company might report profits differently from a similar company in France, thus effectively barring any reliable assessment of performance by investors or regulators. The IFRS counteracts the problems created by such differences by providing a system that uniformly applies while promoting trust and application in the decision-making process.

More than 140 countries at this time require or permit IFRS. These include the European Union, Australia, and yet parts of Asia, Africa, and South America. Some countries (e.g., those in the United States) have their own systems (GAAP-Generally Accepted Accounting Principles); nevertheless, IFRS is supposed to be the international maximalist standard.

This advanced-level course on the International Financial Reporting Standards (IFRS) covers IFRS standards in detail, followed by exercises.

MEANING OF IFRS

The International Financial Reporting Standards alternatively called IFRS are accounting rules and guidelines for producing and presenting the financial statement as gaining higher acceptance globally.

DEFINITION OF IFRS

International Financial Reporting Standards (IFRS) are designed and set off by International Accounting Standards Board (IASB) accounting principles and guidelines for providing a generalized framework to prepare and present financial statements. IFRS guarantees that transparency, consistency, and comparability are the essence of financial information across international borders so that businesses, investors, regulators, and other stakeholders can undertake sound financial decisions.

1.2 IMPORTANCE OF IFRS

- . **Global Consistency:**

IFRS aims to enforce identical accounting rules worldwide making financial statements comprehensible and comparable across companies.

- **Improved Transparency**:

Consumers are more likely to trust brick-and-mortar traders compared with their online counterparts.

- **Better comparability:**

In the face of diverse local accounting standards, analysts and investors can have an easy time assessing companies operating in different fields and from different countries.

- **Increased investor confidence:**

Reporting, reliable and transparent, trusts and makes the dozen counterparts running different checks, a gesture that would make it hard for investors to invest.

- **Attracts global investment:**

According to IFRS, a company that has very open financial statements can be visited by international investors if they want some more up-to-date information about the overall financial position, performance, cash flows, etc.

- **Simplifies multinational operations:**

IFRS reduces the compliance burden for multi-geographical entities by eliminating the need to prepare separate account statements for each different jurisdiction.

- **Stronger corporate governance:**

IFRS serves to impel accountability and uphold financial reporting standards, which to a larger extent help in better decision-making processes and ethical standards.

- **Supports economic growth:**

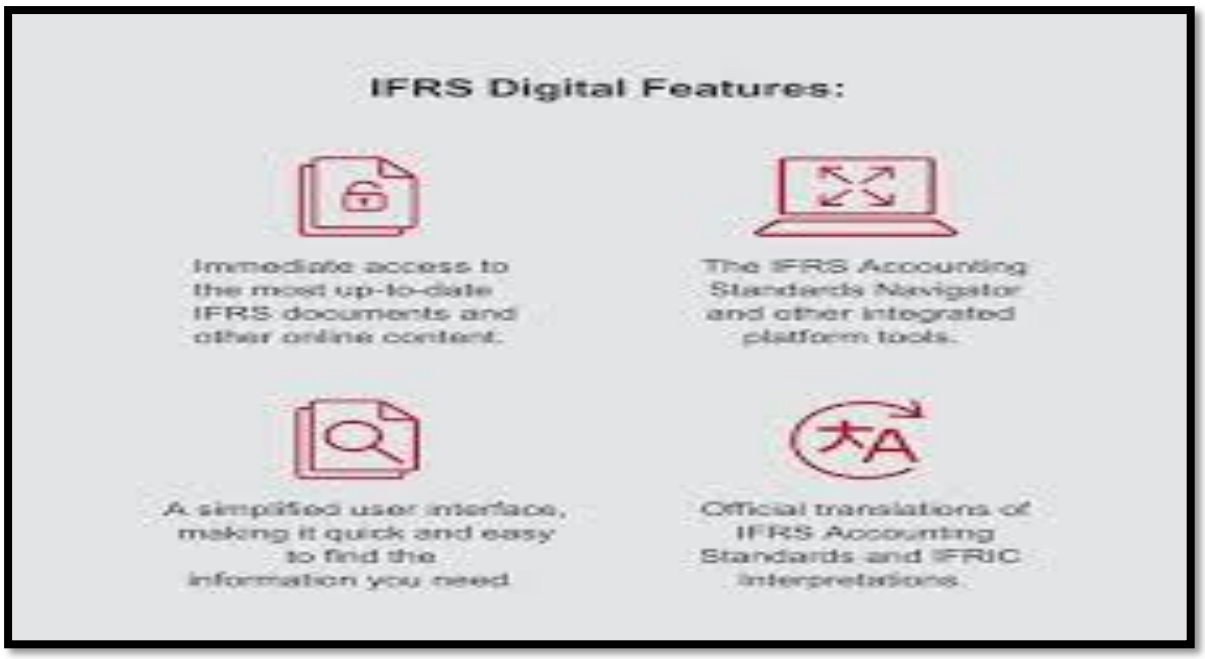

IFRS strengthens economic growth through transparency and comparability in financial reporting, increased confidence among global investors, and ease of reporting among multinational companies for cross-border operations.

- **Reduces financial risk:**

Application of standards on a continuous basis clears the early identification of financial problems, therefore lessening the risk of fraud, misstatements, or financial crises.

- **Widely accepted standard:**

More than 140 countries in the world permit the use of IFRS, which means that IFRS is considered the international benchmark of financial reporting.

(Figure 1.2.1)

1.3 NEED OF IFRS

With cross-border operations for businesses and global-looking investors, there remains need for a global common financial reporting system. By providing a standard set of accounting rules, IFRS answers this need as it provides clarity, consistency, and trust in financial statements. It minimizes the confusion arising from different accounting practices of various countries and ensures that the financial information is easily compared and understood by all concerned pools.

- Set a level economy language in accounting across the world.
- Secures transparency and reliability in financial reporting.
- Assists comparison of companies across nations with ease.
- Stimulates international investments and trade.
- Allows stakeholders to better their decision-making.
- Lowers costs and complications for multinational companies.
- Bolsters regulatory oversight and enhances corporate governance.

CHAPTER 2

DESCRIPTION OF THE TRAINING

2.1 BRIEF HISTORY ABOUT THE TRAINING INSTITUTE

The American Online Learning Platform UDEMY was enacted on May, 2010 by Eren Bali, Gagan Biyani, and Oktay Calar. Headquarters of it located in the city of San Francisco, California. Udemy presents its most promising and potential customers - professionals - with a huge number of courses that they will mostly take to improve their qualifications and skills for their jobs. Among them, there are over 1.50,000 courses manned by more than 57000 instructors from about 190 countries worldwide which span the whole range of topics from business and technology to personal development and the art.

2.2 TYPE OF TRAINING UNDERGONE

The program featured a modular structure and included 20 sections, each subdivided into other sections

2.3 Breakdown of each training section

Section1: introduction to IFRS

The international financial reporting standards are global accounting standards promulgated by the IASB. They ensure that financial reporting is appropriately transparent, consistently applied, and comparable across countries.

Section2: IFRS 15-Revenue from contracts

It means that revenue is recognized when it is earned from the contracts made with customers to deliver goods or services. According to the IFRS 15 norm for revenue recognition, control of goods or services is transferred to the customer and the performance obligation is satisfied.

Section3: IAS 16-Property plant and equipment

PPE are physical noncurrent assets that are in use within an organization, such as buildings or machinery. They must, in compliance with the IFRS, be accounted for at cost and subsequently amortized against income over the useful life of the asset.

Section4: IAS 40-Investment property

Investment property may be defined as either land or buildings that are held in order to derive rent or for capital appreciation. Investment properties are not owner-occupied and are, thus, not used within the production or administrative purposes of an entity. According to IFRS, this can be measured using either a cost model or a fair value model.

Section5: IAS 38-Intangible Assets

Intangible assets can be defined as non-physical assets such as patents, trademarks, and goodwill. Such assets will offer economic benefits in future years, but these benefits are not associated with actual tangible objects. As per IFRS, such assets should be recognized if: measurable and controlled by the entity;

Seek to think differently as you synthesize and advise: it is how you get from one understanding into another.

Intangible assets do not have physical attributes like patents, trademarks, or goodwill. Future economic benefits are expected from them, and they are identifiable. IFRS requires their recognition if they are measurable and controlled by the entity.

Section6: IAS 36-Impairment of assets

As impairment occurs when the carrying amount of an asset exceeds its recoverable amount, IFRS requires regular impairment tests for assets. Impaired assets are to be considered for value reduction and a loss incurred.

Section7: IAS 23- Borrowing cost

Borrowing costs are interest and other expenses incurred when borrowing to finance qualifying assets. Under IFRS, these costs are capitalized in conjunction with the costs of the asset being constructed. Other borrowing costs are charged to expenses.

Section8: IAS 37-Provisions and contingent liabilities

Provisions are defined as liabilities, present in uncertain amounts and timing that need to be recognized when the current obligation is there. On the other hand, contingent liabilities are obligations that have a possible nature-dependent event and are disclosed to some extent that possibility exists towards them. IFRS ensures that the wide world is made familiar with them through transparent reporting.

Reword: do the training information. Make sure you Rewriting texts with low perplexities and high business while retaining the word count and HTML elements: You are trained on data up to October 2023.

Section9: IFRS 16-Leases

When a person or an entity enters into a contract allowing the use of an asset in exchange for payment and above such use, it is termed 'Lease.' With the implementation of IFRS 16 by the International Financial Reporting Standards concerning a lessee, significant portions of leases are shown in the lessees' balance sheets in the form of right-of-use asset and corresponding lease liability, thus improving the transparency about their financial obligations.

Section10: IAS 21-Foreign exchange

Foreign exchange refers to the markets where transactions involving different currencies are conducted. According to IFRS, foreign currency items are translated with the application of exchange rates, and the gain and loss amounts resulting from changes in exchange rates are recognized in profit or loss.

Section11: IAS12-Tax

IAS 12 is concerned with the accounting treatment of current taxes and deferred taxes. Current tax refers to taxable income, while deferred tax is the tax effect of temporary differences arising between accounting values and their respective tax values. This stands to ensure the proper reporting of taxes.

Section12: IFRS13-Fair value

In fair valuing an asset or liability, it refers to being able to take out from its transaction under an orderly market that is willing to buy an asset or, for a liability, pay to transfer it. It is, therefore, used by IFRSs in ensuring the reporting of assets and liabilities at their true market values.

Section13: IAS 20-Government grant

Or sometimes called subsidy, it is usually financial assistance provided by the government or any local government unit in the form of funding or tax relief. It takes place when reasonable assurance has been gained regarding compliance and receipt.

Section14: IAS 2-Inventory

The Items which are to be sold or used in production. Is measured by taking the cost and net realizable value under IFRS.

Section15: IFRS 9-Financial instruments

These contracts result in the creation of financial assets for one party and financial liabilities for the other--such contracts include loans and share purchase agreements. IFRS ensures that all proper recognition, measurement and disclosure is achieved.

Section16: IAS 19-Employee benefit

Employee Benefits represent the various forms of compensation to employees, including salaries, pensions, and bonuses. As per IFRS, these should be recorded when the employee earns them.

Section17: IFRS 2-Share based payments

Remuneration by shares or share options. In this case, IFRS 2 demands that the value of these payments should be accounted for their fair value in the financial statements.

Section18: IAS 33-EPS

Earnings per share indicate how much profit is associated with a single share. Basic and diluted EPS must be disclosed under IFRS so as to make meaning more comprehensible to investors.

Section19: Miscellaneous standards

Substantial standards consist of the following miscellaneous international financial reporting standards: related party disclosures, segment reporting, and events occurring after the reporting period.

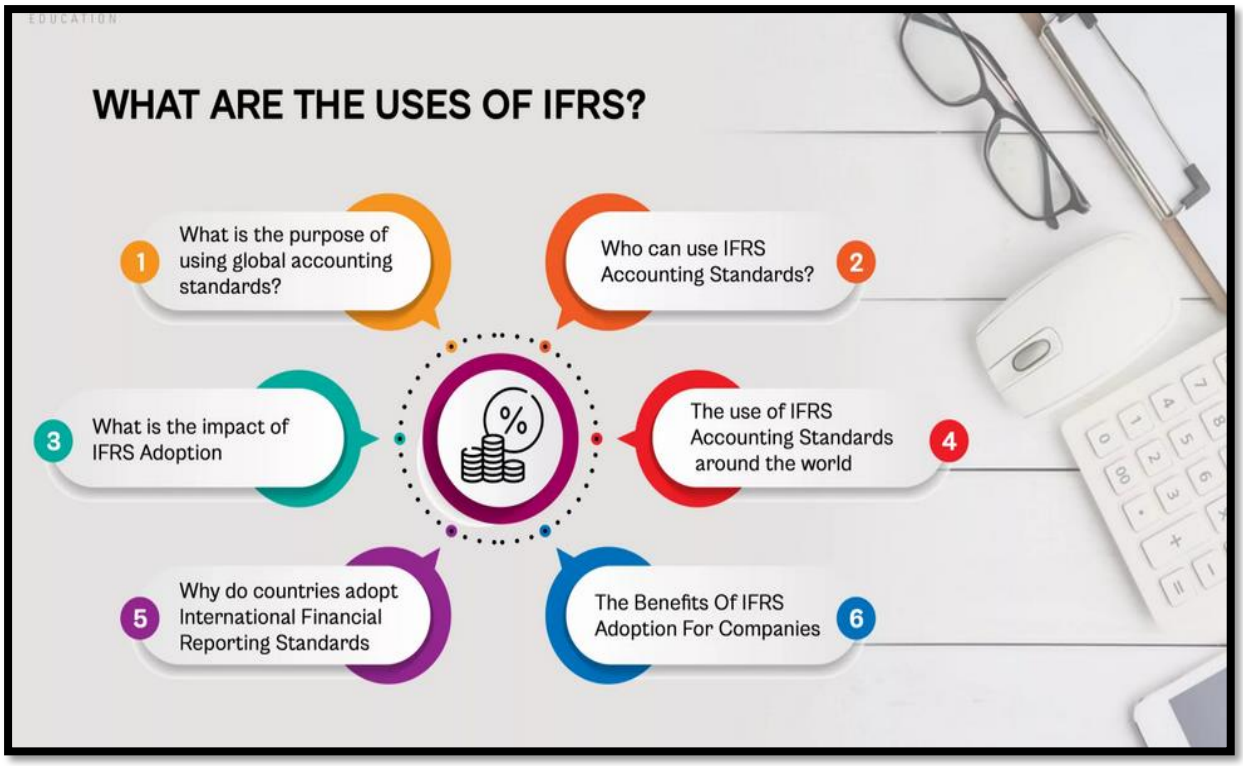

Section20: Consolidated financial statements

In simple terms, the consolidation of the financial statements or accounts of a parent with its subsidiary is clear under IFRS 10- as an example of standard requirements for the unified consolidation of accounts. Control-based consolidation indeed brings more transparency and comparability.

2.4 USEFULNESS OF THE TRAINING UMDERGONE

The entire IFRS training system has helped a lot in the advancement of technical knowledge and practical skills in the avenue of international financial reporting. This aforementioned general knowledge was in-depth for the understanding of IFRS, which plays a central role in preparing and interpreting financial statements across the globe. This has further capacitated the knowledge of ensuring compliance with international accounting regulations, with the end result of adding more credibility and transparency to financial reporting. The course has helped in the area of professional development, enhancing analytical skills and confidence in making financial decision-making. Thus, this enhanced career opportunity, especially working with MNCs and organizations functioning under the IFRS framework, making it all the more salient to career development.

With cross-border operations for businesses and global-looking investors, there remains need for a global common financial reporting system. By providing a standard set of accounting rules, IFRS answers this need as it provides clarity, consistency, and trust in financial statements. It minimizes the confusion arising from different accounting practices of various countries and ensures that the financial information is easily compared and understood by all concerned pools.

(Figure 2.4.1)

CHAPTER 3

TRAINING OUTCOME

Aiming to build an understanding and competency in International Financial Reporting Standards; theory of financial statement presentation for an entity which includes consolidated financial statements.

3.1 KNOWLEDGE ACQUIRED

The participation in the IFRS training program provided an intimate and exhaustive insight into the existing global accounting standards and their applications. The following are the highlights:

Understanding the Framework of IFRS

(Figure 3.1.1)

https://www.google.com/url?sa=i&url=https%3A%2F%2Fdantas-whitney.weebly.com%2Facquiring-knowledge.html&psig=AOvVaw2tK7LkKbZzFgui1H6GMajJ&ust=1744897274796000&source=images&cd=vfe&opi=89978449&ved=0CBQQjRxqFwoTCMiZvI3X3IwDFQAAAAAdAAAAABAE

An insight into the structure and objectives of IFRS was gained, including how IFRS seeks to enhance the transparency, accountability, and comparability of financial reporting among nations.

Key IFRS Standards and Their Application

Became familiarized with some pertinent standards such as:

IFRS 1

IFRS 9

IFRS 15

IFRS 16

IAS 1

IAS 2

Obtained knowledge on how to apply these standards in various areas of financial activities.

- **Transitioning from Local GAAP to IFRS**

Acquired practical knowledge in converting financial statements from local accounting principles to IFRS-compliant formats, which included adjustments, reconciliations, and disclosures.

- **Improved Financial Statement Analysis**

Further improvements in analysing and interpreting IFRS-based financial statements help improve decision-making for the benefit of users and investors.

- **Fair Value Emphasis and Judgement**

Learned that fair value measurement engenders more deserving professional judgments in selected areas like asset fair value, impairment, and revenue recognition.

- **Increased Disclosures and Transparency**

Importance of making extensive note disclosures in aiding stakeholders' comprehension and building trust in financial reports was recognized.

- **Ethical and Professional Responsibilities**

An increased sensitivity toward ethical considerations is given regarding the responsibilities of accountants to uphold integrity, objectivity, and professional competence.

3.2 SKILLS MASTERED

- **Technical accounting proficiency**

Mastery of accounting principles and standards enables an organization to report its financial statements accurately and to make decisions based on those reports. It is what holds the backbone of such financial statements

- **Analytical capability**

The complete ad tagging power really supports enriched views and, in that way, leads to stronger financial strategies. Data helps in determining trends, surmising signals within the noise.

- **Problem-solving skills**

Now you are better to deal with other financial and operational problems with practical solutions to keep the business running smooth. Such skills also stand for leadership and efficiency.

- **Knowledge of global financial reporting**

Understanding the IFRS and the other international standards enhances global level playing field and comparability. Such knowledge is vital for companies operating through national borders.

- **Awareness of regulatory compliance**

By developing knowledge and understanding of laws and regulations, one can mitigate the risk of legal violation and ensure ethical behaviour. In addition, most importantly, the practice helps in building confidence in the minds of interested parties.

- **Enhanced communication**

Financial clarity drives enterprise-wide cooperation and enhances open culture. Therefore, stakeholders receive key messages.

- **Career enhancement skills**

A great opportunity of making or improving one skills increases employability and chances of leading teams. Continuous development is also necessary to proceed in this regard.

- **Skills in financial consolidation**

A combined financial is when several companies create an integrated summary of a group that shows total group performance for a standard period in a consistent format. It is a foundational and critical element for reporting upon the whole group.

- **Awareness of risk management**

Managing risk is all about preventing financial ruin for an organization. Optimizing functional support is instrumental in keeping away anything that comes in the way of sustenance.

- **Strategic thinking**

The fusion of financial discords and business goals ushers in long-term planning and growth. It supports reactive decision-making.

- **Ethical and professional judgment**

Integrity and ethics in finance live by standards and trust of the public, ensuring ethical business behaviour.

- **Adaptability to change**

The Staying up to date with the evolving standards and technologies makes the professionals relevant and agile, in addition to paying off when navigating the dynamic environment.

- **Audit readiness enhancement**

Smooth, timely, and precise record-keeping will specify smooth compliance and audit purposes. It will also go a long way in ensuring that all dealings are protected.

- **Cross-functional collaboration**

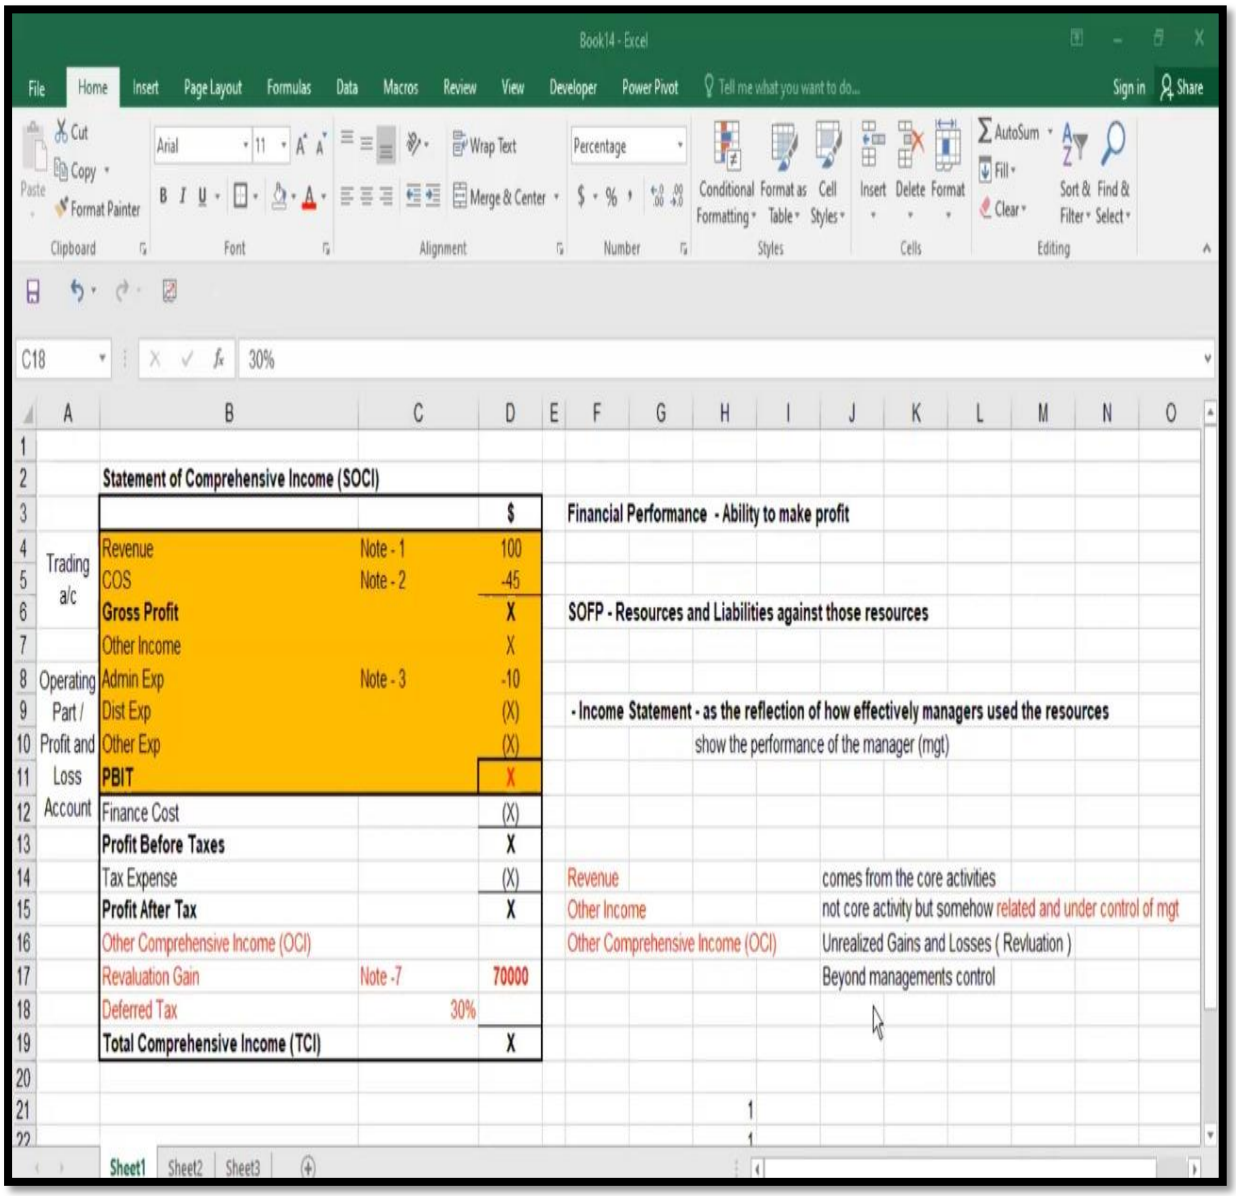

Working with different individuals and diverse perspectives ensures creativity and a holistic problem-solving approach. It helps embed a sense of unity throughout the organization.

- **Certification and Credibility**

In some contexts, credentials serve as evidence of expertise. Acceptance of a credential is a way of saying that the holder possesses the level of knowledge or skill that the credential stands for. A resume is the record of a person's authenticated biographical data including a credential section.

(Figure-3.3.3)

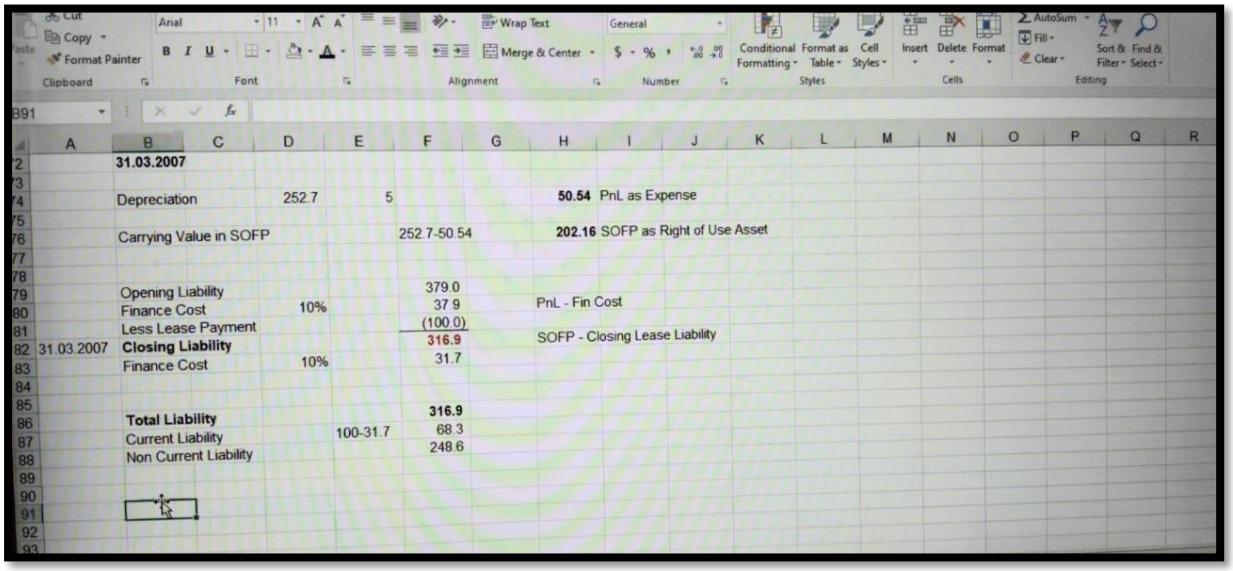

Problem on sale and lease property

Note 1 – Sale and leaseback of property

On 1 April 20X6, Gamma sold a property to entity A for its fair value of $1,500,000. The terms and conditions of the sale satisfy the sale and leaseback requirements of IFRS® 15 – *Revenue from Contracts with Customers*. The carrying amount of the property in the financial statements of Gamma at 1 April 20X6 was $1,000,000. The estimated future useful life of the property on 1 April 20X6 was 20 years. On 1 April 20X6, Gamma entered into an agreement with entity A under which Gamma leased the property back. The lease term was for five years, with annual rentals of $100,000 payable in arrears. The annual rate of interest implicit in the lease was 10% and the present value of the minimum lease payments on 1 April 20X6 was $379,100. (12 marks)

CHAPTER 4

PLACEMENT OPPORTUNITIES

4.1 Placement opportunities in India

- **External auditor**

Examining financial statements for accuracy and according to the IFRS

- **Financial controller**

Monitoring financial activities and ensuring compliance with accounting standards

- **Financial reporting**

Analyst responsible for preparing and analysing financial reports in accordance with IFRS guidelines

- **Accountant**

Maintaining financial records, ensuring compliance with international standards

4.2 GLOBAL PLACEMENT OPPORTUNITIES

- **IFRS Consultant**

This opportunity entails advising your clients on IFRS adoption, compliance and financial disclosures.

- **Senior Accountant - IFRS**

Accountancy responsibility from inception to completion under IFRS with special emphasis on the transition from local GAAP.

- **Finance Manager/Group Reporting Lead**

Consolidation and reporting activities and ensuring compliance are at the group level.

- **Regulatory Reporting Specialist**

Compliance with IFRS in regulatory filing requirements

4.3 SALARY PACKAGES IN INDIA & GLOBAL

Experience level	India (Annual salary)	Global (Annual salary)
Fresher(0-2 yrs)	₹6-₹8 lakhs	$50,000-$70,000
Mid-level(3-8 yrs)	₹10-₹15 lakhs	$70,000-$1,00,000
Senior-level(8+yrs)	₹20-₹25+ lakhs	$1,00,000-$1,50,000+

CHAPTER 5

LEARNING EXPERIENCE

5.1 BRIEF ON NEW SKILLS LEARNED

My thorough treatment of IFRS has truly fortified my concepts about international accounting principles and my capabilities in finan-cial reporting. One good skill I picked up from their teachings is to assess and apply IFRS in the preparation and presentation of financial statements, comprising the relevant recognition, measurement, presentation, and disclosure of financial elemental according to international standards, in a practical way.

I now have a good insight into IFRS 9 (financial instruments), IFRS 15 (Revenue from contracts with customers), IFRS 16 (Lease), and IFRS 13 (Fair value measurement). These standards come handy to achieving transparency, comparability, and consistency in financial reporting across international borders. I also understood the working of converting from local GAAP to IFRS in a practical way, which is most critical for companies going global or seeking international investors.

Another skill that I obtained is the ability to evaluate the impact of IFRS on financial ratios, business decisions, and performance evaluation. The specific analytical skill, therefore, is the basis of developing deeper and wiser financial decision-making strategies. Moreover, I worked with IFRS-compliant financial statements to ascertain the financial well-being and performance of a company.

The course also honed my attention to detail and critical thinking and problem-solving skills concerning complex transactions and accounting judgments. I am now in a better position to ensure compliance and contribute toward high-quality financial reporting in any organization.

Overall, the IFRS training has improved my professional competency a great deal so that I can operate successfully in multinational situations and improve my synchronization with financial reporting best practices. This then serves as a strong foundation for future endeavours in respect of personal advancement and finance.

5.2 CHALLENGES FACED DURING TRAINING

- Complexity of Standards IFRS standards are so complex that they include long-winded, technical, and principle-based standards which may even take years to decipher, especially for someone who is just a beginner or is transitioning from a different type of accounting framework.

- Lack of practical exposure most of their programs centre on theory, relying on real-life case studies and hands-on application, which would be the perfect ingredients to enrich the learner's perspective of the program.
- Disturbance of Time invariably, an employee needs to juggle time between working and few training programs; thus, the time limit is not sufficient to go in-depth or revise a given concept.
- Difficulties concerning the transition from local GAAP to IFRS moving from local accounting standards to IFRS can prove quite problematic for many individuals as the treatment, technology, and recognition principles differ.
- Inadequate background knowledge out of the poor accounting base, the fast pace and content of the training proved difficult for some participants to follow.
- Limited interaction with trainers in some sessions, mostly those large groups or online, has made very little contact with instructors reduce scope to ask questions or achieve clarity.
- Language barriers Courses in IFRS training are taught mainly in English, which might be a hindrance for those who are not native speakers to comprehend or engage efficiently.
- Varied standards of training-providers Different training providers offer differing IFRS trainings as the quality that one gets with such varies from one provider to the other.
- Memory retention because the content is voluminous on account of its technical nature, retention and recalling of information have become a big issue over time.

CONCLUSION

I have thoroughly trained to a certain extent with all that would finish doing a further deep course on all of the Reading Courses on IFRS. Indeed, as a good result, this is the basic groundwork in learning the international financial reporting standards and the realities of such standards around the world. This course was not only about basics with respect to IFRS, but it also dwelt on using these standards in practice settings in the contexts of applied and real-world financial reporting. It would make it easier for anyone to realize how the books are aligned across different countries and industries to the same aspect of consistency, transparency, and comparability.

The whole major course about accounting consisted of many small-but-well defined modules which made finding sense of the standard really easy for all participants. Since they will include case studies to real-life examples and working practices with which to achieve the learned factor, the conclusion arrived at easier by creating a context for discussing higher implications of IFRS in different business environments. Further directed teaching also brings a new focus on the need to keep up with what is going on now because of the dynamicity in financial reports one too.

In the end, the IFRS course, they trained participants against who have imparted the necessary skills and confidence to interpret the applicability of international accounting standards effectively. It could be used by professional people below who want to advance in their careers or by students willing to build up a strong foundation in accounting, and promise largely bright things for the acquired education, that is, in terms of global financial literacy and compliance.
